EDUCATION

Graphic Era Hill University

B.Tech – CSE with specialization in AI and ML - **CGPA - 8.02**

2020 – 2024

Dehradun, Uttarakhand

EXPERIENCE

Tech Mahindra

February 2025 - Present

Role – Associate Technical Support

Noida, India

- Contributed to the development of a centralized platform using Google Cloud Platform (GCP) for monitoring enterprise network devices and Microsoft SQL Server database servers, improving infrastructure visibility and operational efficiency.
- Designed and optimized Microsoft SQL Server database schemas for storing monitoring data, and integrated the platform with the Salesforce ticketing system to automatically log and track network-related incidents for efficient issue resolution.
- Supported the implementation of automated monitoring capabilities that enabled faster identification of network and database performance issues by generating alerts and creating Salesforce tickets for timely investigation and resolution.

Oil and Natural Gas Corporation

July 2023 - August 2023

Role – Full Stack Development Intern

Dehradun, Uttarakhand

- Developed and delivered a centralized web platform for the IDT Department within the stipulated timeline, streamlining departmental operations and improving accessibility to information and services.
- Built the application using Visual Basic and ASP.NET, with Microsoft SQL Server for efficient database management and seamless data flow. Implemented robust user authentication mechanisms to enhance data security and protect sensitive departmental information.
- Improved the department's existing workflow by digitizing and centralizing key operations through a secure, database-driven web application, reducing manual dependency and enabling more efficient information management.

PROJECTS

PathFinderJS – A Visual Guide to Graph Algorithms | [HTML5](#), [CSS3](#), [JavaScript](#) **November 2024**

- Designed a simulation of shortest-path finding algorithms using JavaScript.
- Utilized two graph algorithms: Dijkstra's and A-star. Also applied Randomized DFS for maze generation.
- Expanded the project scope by developing a reverse snake game, integrating path-finding algorithms for the snake's movement.

PortFolio – Interactive Portfolio with GitHub Pages | [HTML5](#), [CSS3](#), [JavaScript](#)

January 2024

- Implemented responsive design principles for optimal viewing on various devices.
- Deployed the website using GitHub Pages for public access.

CIFAR – Object Recognition Using ResNet50 | [Python](#), [TensorFlow](#), [OpenCV](#)

October 2023

- Designed a deep learning project utilizing essential neural networks.
- Employed the ResNet50 model, a pre-trained Convolutional Neural Network (CNN), for object recognition.

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, SQL, PHP.

Machine Learning & AI : Neural Networks, Deep Learning, ResNet50, Computer Vision.

Technologies & Frameworks: HTML5, CSS3, Bootstrap.

Tools: VS Code, PyCharm, IntelliJ, Microsoft SQL Server, Jupyter Notebook, Google Colab.

RESEARCH & PUBLICATIONS

- Machine Learning Application in Lung Cancer Prediction: Insights from Random Forest. (Published in **IEEE Xplore**)
- Performance Analysis of CNN Model for Disease Prediction on Spark and Hadoop. (Published in **IEEE Xplore**)
